Why isn't your classroom working?

Lack of enough time for student-teacher interaction

Manual grading is time taking

Missing Visual and Interactive aids

Lack of personalised learning assistant

Reiteration for a specific student is not possible

Unavoidable peer pressure

Concept assessments lowers misconceptions

We have a unique assessments package scientifically designed to replace conventional exams, thus allowing to identify gaps and act on them with empirical data.

We provide chapter-wise, class, unit, and end-term assessments with high-quality questions for all grades. Question papers are customizable with class-level and student level report and remediation support.

GOOD BRICKS

Adaptive Math Practice

With this technique, we determine individual's learning needs and comprehension level. It monitors how well student understood concepts and instruction automatically adjusts itself.

Every child has unique learning path. With us, your student's unique path is carved.

It motivates students to learn new things and engage more time in practice. It designs on-the-go student-driven materials with a special focus on individual needs to learn a concept. Beyond memorization, students grasps the concept.

Using mistakes as building blocks of learning

We design building blocks on the misconceptions and mistakes of learners. Instead of simply correcting the mistakes, we aim at finding the reason behind the mistakes. For those identified misconceptions, we provide customized exercises for individual learners.

The goal is to reduce classroom anxiety, increase confidence, and ensure long-term retention of concepts through experiential learning.

The Continuous Comprehensive Evaluation is mandated by the RTE Act. It requires schools to conduct continuous evaluation by means of small assessments throughout the academic year

**Conduct
hassle-free
formative
assessments
on a regular
basis**

**Have access
to students'
learning
outcomes in
real-time**

**Create lesson
plans in
accordance
with student
learning
needs**

**Identify slow
learners and
suggest
remediation**
