

LMS FOR LARGE-SCALE SKILL DEVELOPMENT

OUR COMPANY

Radius EduTech is an education technology partner for large-scale educational institutions developing, implementing, and conducting their academic processes. We specialize in technologies for large-scale registrations, course management, examinations and online courses.

PROJECT

Radius LMS streamlines and automates all essential tasks relating to course management, such as student registration, eligibility check, payment processing, documentation management, training management, course certificates, analytics and reports, and course recommendation. You can use this system to enroll and manage large-scale courses for any stream. And it seamlessly integrates with third-party training applications to provide centralized access and an overview of your course.

State governments can deploy this solution to significantly improve the delivery of skill-based training programs to their citizens.
